

Committed to Green Energy-1

- Through construction of solar power plants, GlobalWafers tries to fulfill its social responsibility to make the world greener.
- Till March 31st this year, the cumulatesolar capacity reaches 9.6 MW, which could generate 11.27 million kWh electricity and equals to reducing 5,737 tons of CO₂ emissions and planting 521,584 trees per year.

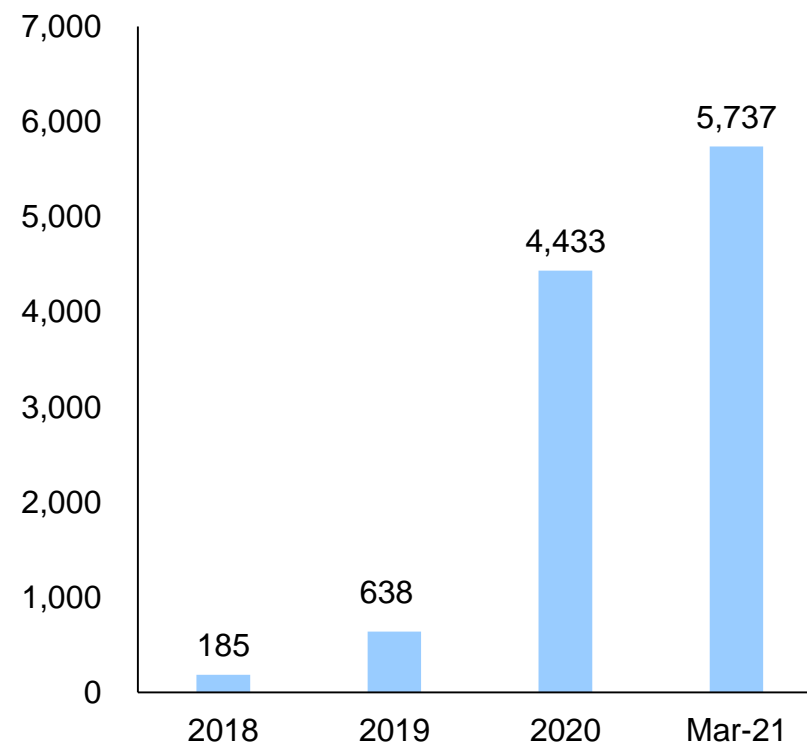

GWC Solar PV Capacity (Accumulated)

Unit: MW

CO₂ Emission Reduction (Accumulated)

Unit: ton CO₂e

Committed to Green Energy-2

- As one of the pioneers in green energy, GlobalWafers actively extends its solar footprint by providing high-efficiency panels for a greener earth.
