

5.5 Social Participation

The GlobalWafers Group upholds the philosophy of "Caring for Society and Sustainable Development" in fulfilling its corporate social responsibility. The Group has long taken "giving back to society" and "caring for the disadvantaged" as its guiding principles, supporting Taiwan with love and responsibility. The Company continues to assess risks and opportunities in the regions where it operates. In Taiwan, these regions include Hsinchu and Miaoli, while overseas sites span eight countries, including the United States, Italy, and Japan. We are committed to supporting underprivileged groups in rural communities, including economically disadvantaged families, children and youth, and persons with disabilities. Through charitable donations, we aim to improve their living and educational conditions. In addition, we carry out concrete environmental protection initiatives through volunteer service at our operating sites.

Donation Activities	Recipient Organization	Amount / Type of Gift / Quantity
Wennei Community Ecological Tour Development and Smart Experimental Farm Project	Wennei Community, Zhunan, Miaoli	NT\$910,000
Taiwan Unsung Hero Charity Screening Program	Taiwan Renaissance Platform	NT\$500,000
Pioneer Seedling Program – 2025 Charity Science Camp	Hsinchu Aisi Community Development Association	NT\$550,000
2025 National Smart Manufacturing Big Data Analytics Competition	Ministry of Education	NT\$1,500,000
Danas / Ragasa Wind Disaster Repair Project in Hualien	Catholic Our Lady of China Social Welfare Foundation	NT\$271,600
Suspension Transfer System Improvement Project	Genesis Social Welfare Foundation, Miaoli Branch	NT\$227,600
Learning and Building Canoe Catamarans	Kids' Book House	NT\$103,400
Mid-Autumn Festival Charity Donation Campaign	Huakuang Intellectual Development Center, Hsinchu County Catholic Shihguang Home, Hsiang Yuan Memorial Home	NT\$79,000
Donation to the 2025 Winter Warmth Charity Fair	Hsinchu Branch Office, Taiwan Fund for Children and Families	NT\$15,000
2025 Earth-Friendly Beach Cleanup Activity	Long Fong Fishing Port, Miaoli County	A total of 116 participants joined the activity, removing approximately 200 kilograms of waste
Employee Blood Donation Activity	Hsinchu Blood Center	A total of 187 employee participations were recorded, with 81,000 c.c. of blood donated in total

Environmental Conservation

Wenwei Community Ecological Tour Development and Smart Experimental Farm Project

GlobalWafers promoted an ecological tour and smart farm project in Wenwei Community, Zhunan, Miaoli, integrating ecological conservation, environmental education, and local revitalization. Through an OMO (Online-Merge-Offline) platform and AI-powered species identification, the project deepens ecological understanding, while training local residents as tour guides to promote employment and cultural inheritance. At the same time, IoT-based smart agriculture is introduced to create a sustainable model of shared prosperity between the Company and the community.

2025 Earth-Friendly Beach Cleanup Activity

For six consecutive years, GlobalWafers has held beach cleanup activities at Long Fong Fishing Port in Zhunan, Miaoli, inviting employees and their family members to participate. In 2025, a total of 116 employees and family members joined the activity, removing approximately 200 kilograms of marine waste. Through long-term adoption efforts and plastic reduction initiatives, GlobalWafers has deepened its connection with the local community and demonstrated its commitment to protecting the environment and advancing sustainability.

Italy Site: Installing Beehives to Implement Biodiversity Conservation Actions

GlobalWafers' Italian subsidiary, SPA, has installed beehives and planted a variety of vegetation at its site to create habitats for pollinating insects and promote biodiversity conservation. By improving the ecological environment around the site and encouraging employee participation, the initiative demonstrates the Company's sustainable practice of integrating nature conservation into its operations.

Korea Site: Participating in River Restoration Actions

Since 2024, GlobalWafers' Korean subsidiary, MKC, has participated in Cheonan City's "One Company, One Stream" program, adopting a 500-meter section of stream and organizing cleanup activities. The initiative removed approximately 100 kilograms of waste and invasive plant species. This effort strengthens employees' ecological awareness and demonstrates the Company's commitment to working with local communities to protect the environment.

Italy Site: Partnering with Ogyre in Support of Ocean Month

GlobalWafers' Italian subsidiary, SPA, partnered with Italian benefit company Ogyre to promote marine waste recovery and biodiversity conservation. During the cooperation period, SPA donates approximately EUR 20,000 each year to support the "Fishing for Litter" mechanism, encouraging fishermen to recover marine waste and ensure its proper treatment, while contributing to environmental improvement and community support.

Sustainability Education

Partnering with National Yang Ming Chiao Tung University to Promote Carbon Emissions Education and Strengthen Sustainable Talent Development

GlobalWafers continues to promote sustainability education and youth empowerment. The Company was invited to National Yang Ming Chiao Tung University to conduct a teaching activity on climate and carbon management. Through its self-developed board game, Power Up, GlobalWafers transformed the ISO 14064 and ISO 14067 international carbon management standards into scenario-based simulations, strengthening students' practical understanding of climate change and carbon management and cultivating future talent with sustainability literacy.

Participating in National Central University College of Management's 40th Anniversary Lecture to Share Semiconductor Materials Strategies and Sustainable Transformation Practices

GlobalWafers was invited to participate in a lecture hosted by the College of Management at National Central University, where the Chief Sustainability Officer shared insights on semiconductor materials strategies and the Company's sustainable deployment in response to climate risks. The session covered practical topics such as renewable energy, internal carbon pricing, and sustainable supply chains, helping students understand how to balance operational growth with sustainable development while deepening industry-academia exchange and talent development.

Partnering with Formosa 3D to Promote Taiwan Unsung Hero Charity Screenings

GlobalWafers partnered with Formosa 3D to promote charity screenings of Taiwan Unsung Hero, visiting 12 schools across Yilan, Hsinchu, and Miaoli and reaching more than 1,000 teachers and students. Through a mobile cinema truck and environmental education, the program conveyed courage and empathy. Some screenings also incorporated mobile solar power equipment, further deepening the meaning of environmental sustainability and demonstrating the Company's social practice of integrating culture and education.

Science Education & Talent Development

Sponsoring the 2025 National Smart Manufacturing Big Data Analytics Competition

GlobalWafers participated in the 2025 National Smart Manufacturing Big Data Analytics Competition as a sponsor and problem-setting organization. The Company provided crystal growth process images and production-line scenario questions to support academia in applying AI and data analytics technologies in practice, narrowing the gap between academic learning and industry application, promoting industry-academia exchange, and cultivating professional talent in smart manufacturing.

U.S. Site: Local Education Engagement Initiative

GlobalWafers' U.S. subsidiary hosted students from Sory Elementary School for a site visit. Through presentations and site tours, the Company introduced the semiconductor industry and leadership concepts, helping students develop the communication and collaboration skills needed for the future workplace. This initiative demonstrates the Company's commitment to supporting local education and youth development.

Partnering with IC Broadcasting to Launch a Charity Science Camp

Sino-American Silicon Products and GlobalWafers organized the "Pioneer Seedling Program" Charity Science Camp, inviting nearly 60 students, teachers, and school staff from Wufeng and Jianshi to participate in hands-on courses on AI, AR, drones, and renewable energy. The SES team under Sunrise PV, a subsidiary of Sino-American Silicon Products, led a DIY solar-powered car activity, transforming sustainability concepts into hands-on experiences and broadening the scientific horizons of students in rural communities.

Kids' Book House: Helping Children Build a Boat of Dreams

Through donations, the GlobalWafers Group supported Kids' Book House in promoting its marine education program in Taitung, accompanying children as they move toward the ocean, grow closer to it, and gradually learn to engage in dialogue with the world through each experience. For many children, the ocean is vast and unfamiliar, and even carries a sense of fear. Yet, under the long-term and gentle guidance of teachers and coaches, they move from watching from the shore to gradually taking part in the boat-building process, paddling canoes by hand, raising the sails of sailboats, and connecting with the ocean through their own hands and effort.

Care for the Underprivileged

Supporting Post-Typhoon Danas Home Repairs

In response to the impact of Typhoon Danas, GlobalWafers and Sino-American Silicon Products partnered with the Catholic Our Lady of China Social Welfare Foundation through a charitable donation to support post-disaster home repairs and reconstruction for elderly people with disabilities living alone. The initiative aims to help restore basic residential safety and ease the long-term pressures they face in daily life.

Supporting the Installation of an Overhead Patient Lift System at Genesis Social Welfare Foundation's Miaoli Branch

For four consecutive years, GlobalWafers and Sino-American Silicon Products have supported Genesis Social Welfare Foundation's Miaoli Branch, helping fund the purchase of an overhead patient lift system. The system enhances the safety and comfort of transfers for residents with severe disabilities, reduces caregiving risks, and reflects the companies' long-term commitment to caring for underprivileged communities locally.

Sponsoring the Winter Charity Fair for Children

GlobalWafers has sponsored the Hsinchu Family Support Center's "Winter Charity Fair for Children" for 16 consecutive years. Through its support for parent-child activities, the company helps strengthen emotional bonds among supported families. With long-term and tangible care, GlobalWafers also supports underprivileged children and youth in overcoming life's challenges, putting corporate social responsibility into action and working together to create a happier future.

Mid-Autumn Festival Charity Donation Drive

GlobalWafers and Sino-American Silicon Products turned festive care into meaningful social support by launching a Mid-Autumn Festival charity donation drive and providing matching contributions. Donations were made to several social welfare organizations to support the care and daily needs of people with disabilities and children without family support, reflecting the companies' long-term commitment to caring for local communities.

Health Promotion & Community Support

Employee Blood Donation Drive

GlobalWafers and Sino-American Silicon Products regularly organize blood donation drives at their sites in Taiwan. In 2025, a total of 187 participants donated 81,000 c.c. of blood to support medical blood supply needs. Through an institutionalized mechanism for public welfare engagement, the companies continue to strengthen their connection with society and expand their positive impact.

Malaysia Site – Blood Donation Drive

GlobalWafers' Malaysia site partnered with the University Malaya Medical Centre to organize a blood donation drive, with a total of 52 employees participating. The initiative supported the medical needs of patients with chronic illnesses, expectant mothers, and injury patients, transforming corporate resources and employee participation into positive support for the local community.

Japan Site – Supporting a Local Football Club

GlobalWafers' Japanese subsidiary, MJL, supported Utsunomiya's professional football team, Tochigi SC, by participating in match-related activities. This initiative deepened engagement and shared identity with the local community, while strengthening the company's connection with the region.

U.S. Sites – Community Care and Charitable Donation Activities

GlobiTech Incorporated and GlobalWafers America, LLC have long been attentive to the needs of local communities and give back to society through a wide range of charitable initiatives. This year, employees across the sites worked with local charitable organizations to donate canned food and participate in weekly and Thanksgiving food distribution services, helping deliver supplies to families in need and supporting community food security through concrete action.

In addition, employees also collected children's toys and daily necessities to prepare holiday gifts for underprivileged children, bringing care and warmth to more families during the festive season. These initiatives not only demonstrate the companies' commitment to caring for society, but also deepen their collaboration and connection with local communities.

Health Promotion & Community Support

China Site – Charitable Donation Activities

Kunshan Sino Silicon Technology Co., Ltd. regularly visits the Kunshan Social Welfare Institute in spring and autumn each year to provide care and donations. The company donates clothing, food, and other daily necessities, offering tangible support to children without family support at the institute while sharing warmth and care.

Malaysia Site – Employee Care and Team Engagement Activities

MEMC Electronic Materials Sdn. Bhd. cares for employees and their families through a variety of initiatives, fostering a warm and supportive workplace culture. This year, the company provided stationery subsidies for employees' children to support their learning needs, and arranged a flu vaccination program to safeguard employees' health and enhance their sense of security in the workplace. The site also held a Hari Raya celebration, allowing employees to interact and strengthen their bonds in a festive atmosphere. With the opening of the new site, employees also participated in volunteer activities, contributing their efforts to building and improving the new environment. These initiatives demonstrate the company's support for employees and their families, while further creating a vibrant and caring workplace.

Korea Site – Volunteer Service and Donation Activities

Employees of MEMC Korea Company visited a local social welfare organization to participate in an environmental cleaning volunteer activity, helping maintain a clean and tidy facility environment. The company also donated daily necessities, including infant probiotics, laundry detergent, and baby wipes, to support the organization's daily care needs. Through volunteer service and material donations, MEMC Korea Company demonstrates its commitment to corporate social responsibility.

Japan Site – Public Welfare Blood Donation and Environmental Maintenance Activities

GlobalWafers Japan Co., Ltd. builds strong connections with local communities through public welfare initiatives. In 2025, the company organized seven employee blood donation drives, with a total of 138 employees enthusiastically participating and providing stable blood supply support for the medical system. In addition, the site actively supports the environmental cleanup program promoted by the local town government. Twice a year, employees join the community in cleaning the surrounding environment, working together to pick up litter scattered along roads and in public spaces. Through these concrete actions, the company not only helps improve the cleanliness of the area surrounding the site, but also strengthens employee cohesion through participation, working hand in hand with the community to create a more livable environment.

Italy Site – Charitable and Social Engagement Activities

MEMC Electronic Materials S.p.A. has long been committed to social care, education and culture, and environmental protection. In 2025, the site made donations to support several social welfare organizations and sponsored transportation service programs for seniors and patients, helping improve daily convenience for people with limited mobility. In addition, the site participated in public lectures covering science, road safety, and sports, promoting community exchange and knowledge sharing. It also carried out an urban biodiversity program promoted by the Municipality of Novara, supporting the healthy development of pollinating insects and the urban ecosystem by maintaining the natural growth of green spaces.

Employees also actively took part in various community activities, including corporate road races and friendly football matches, with all registration fees donated to charitable organizations that assist homeless people. During the festive season, the site also supported local charitable organizations through pastry donations. Through the continued promotion of diverse public welfare initiatives, the company has built strong connections with the community. In 2025, total charitable donations from the Italy site amounted to approximately EUR 34,695.
